

Ladybug Silicone Breast Milk Collector

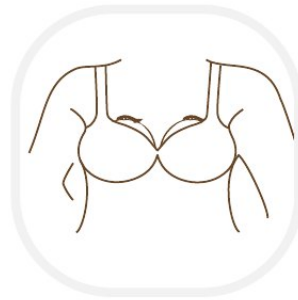

With the plug closed, squeeze the collector and place inside your bra.

Press to your breast to create gentle suction and begin collecting let-down.

The collector can also be attached to the other breast while feeding or placed over both breasts to catch leakage.

Featuring:

- 2 x 150ml Ladybug Silicone Breast Milk Collectors
- 2 x Silicone Breast Milk Storage Bags
- 1 x Double-Ended Silicone Brush
- 1 x Portable Storage Bag

Caring for Your Haakaa Products

Looking after silicone is easy!
Wash your Haakaa silicone products in warm soapy water (just standard dishwashing liquid, please avoid bleach-based agents or sterilising tablets), then rinse and dry thoroughly.
Sterilise in a steam steriliser or boil for 2-3 minutes in a clean pot of water. Do not use a UV steriliser as this may impact the lifespan of silicone products. Do not boil stainless steel parts.
To clean the Portable Storage Bag, wipe with a damp cloth.

Ladybug Silicone Breast Milk Collectors

150ml

Collect every drop of your precious let-down during the day with the Haakaa Ladybug Silicone Milk Collectors!

The discreet, one-piece design attaches securely to your breast while sitting inside your bra and collects any breast milk that would otherwise be lost in a nursing pad. It is completely portable and has small feet on the bottom that lets the Milk Collector stand upright on flat surfaces to prevent any spills after use. Once you have finished collecting your let-down, open the plug on the top and safely pour your milk into your silicone milk storage bag.

Portable Storage Bag

Keep your things safe and dry with our Portable Storage Bag! It's conveniently sized so you can take it with you on-the-go, and the waterproof outer material not only protects your items but is also easy to clean.

Silicone Breast Milk Storage Bags

260ml

Our Silicone Milk Storage Bags are made of food grade silicone and can be reused over and over again, reducing the impact of single-use plastic bags on our environment. They are fridge and freezer safe and can be stored laying down or standing up.

Once you have expressed your breast milk, pour the milk into the bag and firmly push in the leakproof stopper. When you are ready to use your milk, place the bag in warm water to heat the milk and prepare it for drinking. The stopper has been designed with a silicone carry strap, making it easy to carry around your liquid gold safely!

Double-Ended Silicone Brush

Our Double-Ended Silicone Brush features soft and flexible silicone bristles that provide a 360° clean for all your items. On one end, there's a brush head that's perfectly-sized for scrubbing your pumps, bottles and milk storage bags, and on the other, there's a brush with an angled tip to reach the corners of your bottle teats, milk collectors and more!

How to Use the Haakaa Breast Milk Storage Bag

1. Always clean and sterilise after use.

2. Pour up to 260ml of breast milk into bag.

3. Gently squeeze out excess air.

4. Push stopper firmly into opening.
