**Materials:** Wood, Food Grade Silicone

**Volume:** 300ml

**Dimensions:** 140 x 122 x 100 mm

**Colours:** Red/Blue/Green/Orange

**Recommended Age:** 6m+

## Product Description:

Keep your little one happy at the dining table with the Haakaa Wooden Mushroom Bowl! It has a super strong suction base to keep it firmly on the table, making sure that mealtimes are mess-free. It also has a silicone cap, which not only keeps your food fresh and protected but also doubles as a silicone plate!

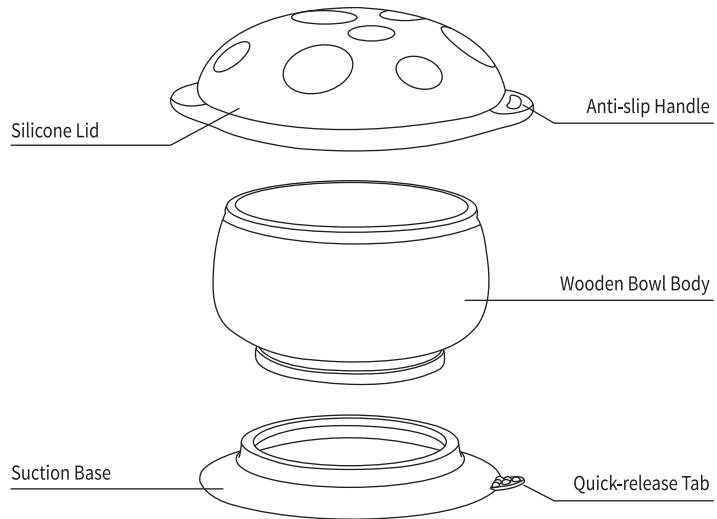

Our Wooden Mushroom Bowls are the perfect way for eco-conscious kids to enjoy mealtimes! Go the extra mile and serve that fresh and healthy meal in a bowl that is not only safe for you and your family but our environment as well.

Handcrafted from wood and perfectly finished, our Wooden Mushroom Bowl is 100% recyclable, biodegradable and virtually indestructible. It is the perfect alternative to plastic and melamine tableware, which leach nasty chemicals into your food and don't break down when thrown in the bin.

Please note: As our wooden dinnerware is handcrafted, there may be some imperfections on the surface such as small scratches.

## Features:

- Made by excellent master craftsmen. Well-polished with smooth surfaces.
- Perfectly sized for your little one's hands, encouraging your baby to eat independently.
- Lightweight, kid-proof and long-lasting.
- Recyclable and biodegradable.
- Kid friendly! No need to worry about the odd drop or accident.
- Suction base to keep the bowl on the table.
- BPA, PVC and phthalate-free.

## Cleaning and Care:

Hand wash with warm soapy water and dry thoroughly. Every so often, rub coconut or olive oil over your wooden dinnerware to keep it happy and healthy - with a little bit of love, it will last a lifetime! Do not use bleach-based agents to clean this product.

## Caution:

Do not use in dishwashers and do not sterilise with steam, boiling water, sterilisers or microwaves as this will cause the condition of the bowl to deteriorate. Do not use scourers to clean the bowl as this will scratch the surface.

**Please note:** Volume measurements are an approximation and should be used for general reference only.
