### Product Description:

Ditch that old plastic freezer tray covered with plastic cling wrap and start freezing in a safe and practical way! The Haakaa Freezer Tray is perfect not only for freezing, but baking, heating, storage and more! Made of 100% silicone, our handy little tray is totally heatproof, oven, microwave and dishwasher safe, and free of any potential nasties that come with leaching plastic freezer trays.

### Features:

- Multi-functional: store, bake or freeze in perfect portions!
- Made of soft and durable 100% food-grade silicone.
- Includes a silicone lid to keep food hygienic.
- Dishwasher, freezer, microwave and oven safe.
- BPA, PVC and phthalate-free.

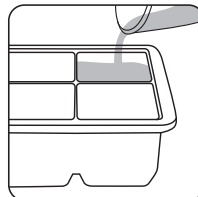

### Cleaning and Care:

Wash before and after each use. Although dishwasher safe, we recommend hand washing with warm, soapy water and rinsing thoroughly. Do not use any bleach-based cleaners or tablets to sterilise or clean your Haakaa products. To sterilise, use a steam steriliser (electric or microwave) or boil in water for 2-3 minutes.

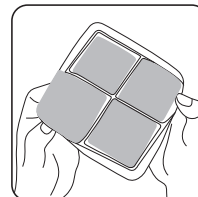

### Caution:

Check product condition regularly. Replace if this product shows any signs of damage. Do not store near any sharp objects. Only soft bristle brushes or soft sponges should be used to clean this product, as hard scourers may scratch the surface. This product is not a toy. Do not use this product for anything other than its intended use. Adult use only. Keep out of reach of children and pets. Take extra care when microwave heating; localised overheating can occur. Always mix the heated food or liquid and check the temperature before feeding. Do not secure lid when microwaving, either remove it or place it loosely on top. Take care when removing the lid after heating as steam may escape.

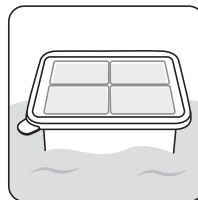

### Freezing Instructions:

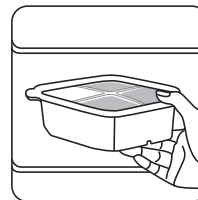

- 1 Fill each compartment and place in the freezer.

- 2 When the cubes are frozen, remove from the freezer and twist the tray. You can also press up on the bottom of each compartment with your finger.

- 3 If the cubes do not pop out straight away, run under warm water with the lid on for a few seconds. The cubes will then pop out easily.

- 4 Use what you need and put the rest back in the freezer.

**Over-use:** Fill compartments and bake as per recipe instructions. Always use a towel or oven mitts when removing tray from oven. Do not place lid on tray when baking/cooking food, as food may rise while cooking. To remove food after baking, allow to cool then twist tray as per freezing instructions above.

**Please note:** Volume measurements are an approximation and should be used for general reference only. Always follow your country's guidelines and recommendations to safely store breast milk.

It is not recommended to keep infant food/breast milk frozen for longer than three months unless in a deep freeze. Do not re-freeze thawed food, breast milk or formula. Solid food is recommended for babies 4-6 months+. Please consult a medical professional if introducing solids earlier.
